bugcrowd

COMPARISON
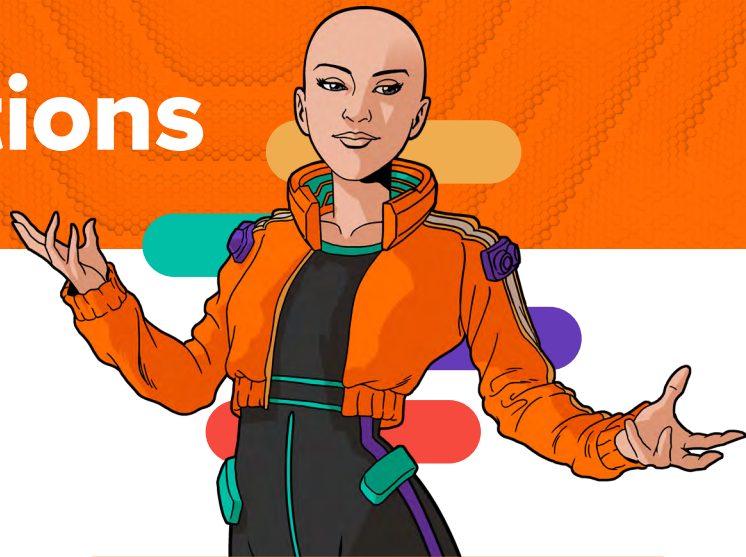

Bugcrowd vs. Other Solutions

Beat threat actors to the punch. Bugcrowd helps you proactively manage the *right* risk.

Crowdsourced security should be strategic, not a shot in the dark. Bugcrowd goes beyond the empty promises of other solutions. Our unique orchestration of data, technology, and human intelligence exposes critical risk so you can proactively reduce and control it.

|	**Bugcrowd**	**Other Solutions**
SAAS PLATFORM BUILT FOR MULTIPLE USE CASES	Pioneered the first multi-solution SaaS platform for crowdsourced cybersecurity to address evolving customer needs.	Are narrow, point solutions that fragment your security environment.
CROWD ENGAGEMENT	Relies on modern, data-driven crowd matching to boost engagement and critical findings by 2x.	Rely on legacy crowd sourcing and engagement that fails to meet real-world requirements.
ENGINEERED TRIAGE AT SCALE	Offers rapid and reliable engineered triage at scale, handling most critical vulnerabilities in just one day.	Treat triage like an add-on or an afterthought, and most rely on small regional teams.
SECURITY INNOVATION	Is the leader in crowdsourced security platform innovation, meaning a better hacker experience, more groundbreaking services, and better results.	Are missing the experience, scale, and platform-centric approach needed to drive innovation.
CUSTOMER SUCCESS AND SATISFACTION	Prioritizes long-term customer satisfaction and success, helping you launch, manage, grow, and get value from your programs.	Do surprisingly little to help your programs grow and improve.
SIMPLE PRICING WITH NO HIDDEN FEES	Offers platform pricing that includes engineered triage with no consulting fees or bounty tax.	Often charge a "bounty tax" on payouts, tack on consulting fees, or bill triage as an additional cost.

83% of ethical hackers and security researchers believe that Bugcrowd offers them more opportunities for success than other platforms[1].

Why Bugcrowd

All organizations need to remain proactive and do everything proactively possible to protect themselves, their reputation, and their customers from being blindsided by cyberattacks. The Bugcrowd Security Knowledge Platform™ finds hidden vulnerabilities before attackers do by uniquely orchestrating data, technology, and human intelligence—including tapping into the global security researcher community ("the Crowd")—for pen testing as a service, bug bounty, vulnerability disclosure programs, and attack service management.

Bugcrowd Security Knowledge Platform™

Vulnerability Disclosure
Accept External Feedback

Bug Bounty
Discover More Vulnerabilities

Pen Test as a Service
Go Beyond Compliance

Attack Surface Management
Find and Prioritize Unknown Assets

Bugcrowd Security Knowledge Platform™

Security Researchers

Researcher Workbench

Validation & Triage

Workflow Orchestration & Automation

Crowd Management

Intelligence, Analytics & Reporting

Core Services

Management Console

Bugcrowd Customers

DevOps Integration — API, Webhooks, and Pre-Built Connectors for JIRA, GitHub, ServiceNow

Best Security ROI from the Crowd

We match you with trusted security researchers who are perfect for your needs and environment across hundreds of dimensions using machine learning.

Instant Focus on Critical Issues

Working as an extension of the platform, our global security engineering team rapidly validates and triages submissions, with P1s often handled within hours.

Contextual Intelligence for Best Results

We apply over a decade of knowledge accumulated from experience devising thousands of customer solutions to achieve your goals for better outcomes.

Continuous, Resilient Security for DevOps

The platform integrates workflows with your existing tools and processes to ensure that apps and APIs are continuously tested before they ship.
