PENETRATION TESTING

Penetration Testing as a Service Solutions

Uncover common flaws in any asset fast, high-impact testing

Summary

Threat actors love status quo penetration testing because its long ramp-ups, inflexibility, low-quality results, and remediation delays leave your digital assets exposed.

In contrast, they hate Penetration Testing as a Service (PTaaS) solutions on the Bugcrowd Platform™. We make penetration tests easy to launch, run, and scale per your precise assets and requirements, while delivering compliance assurance along with better results for risk reduction. Plus, our SaaS platform's advanced analytics and automated workflows help you find and remediate more critical vulnerabilities for true shift-left application security. Key benefits include:

VERSATILE
Configure pen tests for every need, from basic assurance to maximum risk reduction

TALENTED
Access elite pen tester talent matched to your precise assets and requirements

FAST
Launch tests in 3 days or less and run them point-in-time and/or continuously

TRANSPARENT
View findings and tester progress through their methodology checklist in real time

INTEGRATED
Flow findings directly into your SDLC process for fast & early remediation

Bugcrowd PTaaS Solutions

Web Application Pen Test
Test web applications, whether cloud-based or on-premises, of any complexity.

AI Pen Test
Uncover common security-related vulnerabilities in AI systems (data bias excluded)

Network Pen Test
Rely on expert network pen testers to find hidden flaws that other approaches can't.

Mobile Application Pen Test
Count on excellent results from a curated team of mobile app security experts.

Cloud Pen Test
Identify vulnerabilities unique to cloud environments, all while respecting the shared responsibility approach.

API Pen Test
Test the security of your APIs, with results fully integrated with your SDLC, before they ship.

IoT Pen Test
Find cyber-physical vulnerabilities unique to connected devices, from pacemakers to planes.

Social Engineering Pen Test
Run a specialized test to assess how your organization responds to common human-based threats.

How It Works

The Bugcrowd Security Knowledge Platform™ makes it easy to configure tests and includes a rich dashboard for tracking pen test results and methodology progress. In addition to managed triage, real-time visibility into pen test progress, and 24/7 reporting, Bugcrowd Pen Tests include a detailed auditor report about findings and methodology to help meet the strictest compliance needs.

Right Crowd, Right Time

Need special skills? We match the right trusted hackers to your needs and environment across hundreds of dimensions using AI (CrowdMatch™).

Engineered Triage at Scale

Using an advanced toolbox in our the platform, our global team rapidly validates and triages submissions, with P1s often handled within hours.

Insights From Security Knowledge Graph

We apply knowledge developed over a decade of experience across thousands of customer programs to help you make continuous improvements.

Works With Your Existing Processes

The platform integrates with your existing tools and processes to ensure that applications and APIs are continuously tested before they ship.
